Education

Indian Institute of Information Technology (IIIT), Ranchi

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Aug 2023 – May 2027

CGPA: 8.95

Experience

Mornex Technologies

Full-Stack Developer Intern

Oct 2025 – Dec 2025 (3-month internship)

Remote

- Reduced initial page load time by 30% and improved Core Web Vitals scores by implementing server-side rendering (SSR) and lazy-loading strategies across production-grade React.js and Next.js modules.
- Secured all authenticated user flows across the application by designing and integrating JWT-based authentication with NextAuth, connected to RESTful backend APIs for session and data management.
- Improved long-term codebase maintainability and reduced re-render overhead by refactoring legacy class-based components into a React Hooks architecture, enabling faster feature iteration.
- Increased sprint delivery consistency by participating in Agile/Scrum ceremonies, contributing to code reviews and test cycles that surfaced and resolved bugs before each release.

Projects

Vibecode Editor – AI-Powered Web IDE

Nov 2025

Next.js 15, TypeScript, TailwindCSS, ShadCN UI, MongoDB, WebContainers, NextAuth, Ollama, Groq API | GitHub | Live Demo

- Eliminated local environment setup entirely by building a browser-based AI-powered Web IDE on WebContainers, enabling real-time code execution without local installs.
- Reduced debugging time by 40% by integrating LLM-based code assistance via Ollama and the Groq API.
- Secured session handling by designing JWT-based authentication using NextAuth.
- Accelerated developer onboarding by engineering multi-framework project templates (React, Node.js, Express.js).

SwiftKart – Grocery Delivery Platform

Jan 2025

Next.js 16, TypeScript, MongoDB, NextAuth, Socket.io, Leaflet, Gemini API | GitHub | Live Demo

- Cut live-tracking latency by replacing polling with event-based Socket.io and Leaflet integration for real-time order tracking.
- Designed scalable MongoDB schemas to handle product, cart, and order workflows.
- Implemented a Gemini API-powered AI chat assistant for live customer support and delivery-partner communication.

TripHeaven – Hotel Booking Platform

Sep 2025

React, Node.js, MongoDB, Clerk, Stripe, TailwindCSS, Vercel | Frontend | Backend | GitHub

- Enabled secure end-to-end payments by integrating Stripe into a full-stack hotel booking platform.
- Locked down access control by implementing Clerk-based authentication and protected routing.
- Streamlined the booking lifecycle by designing REST APIs supporting creation, cancellation, and modification flows.
- Delivered a consistent cross-device experience by optimizing UI rendering for responsiveness.

Technical Skills

Core CS & Problem Solving: Data Structures & Algorithms (1906 LeetCode rating, Top 4% global), OOP, DBMS, Operating Systems, Computer Networks

Languages: C++, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Express.js, Tailwind CSS

Databases & Cloud: MongoDB, PostgreSQL, MySQL, Prisma, NeonDB, AWS, Vercel

Developer Tools: Git, GitHub, Postman, Clerk, Node.js

Achievements

- Ranked in the top 4% globally in LeetCode contests with a 1940 (Knight) rating, built on 650+ solved problems across LeetCode, CodeChef, GeeksforGeeks, and Codeforces.
- Earned a 3-Star CodeChef rating (1665 peak) with a Rank 272 finish in CodeChef Starters 238, demonstrating consistent live-contest performance under time pressure.
